Summary

I am final year undergraduate student in Computer Science and passionate about front-end development to creates useful tools for the web. I am seeking an opportunity to apply my skills and gain new experiences in a development role with an organization, with the goal of enhancing my abilities and contributing to impactful projects and bring value to user.

PROJECTS

ThreadHub 🗄 | NextJS 13, Clerk, and MongoDN

August 2023 – October 2023

- Spearheaded the development of a highly interactive thread platform using Next.js 13 and Clerk for user management.
- Leveraged MongoDB for the backend, enabling seamless thread creation, search, and management.
- Implemented user-friendly profile editing, comprehensive thread interaction analytics, and post management, resulting in a significantly enhanced user experience.

Admin Panel 🗄 | ReactJs, SCSS

January 2023 – February 2023

- Built a admin panel for seamless product and user management.
- Enables efficient addition and deletion of products, as well as user creation and removal.
- Streamlined interface for optimal administrative control with 4-5 admin handler and user experience.
- Handle the database and integrated the module with other existing modules.

Showcase 🗄 | ReactJS, TailwindCss

December 2022 – January 2023

- Crafted a sleek personal portfolio using ReactJS, Tailwind CSS, and Framer Motion for smooth transitions.
- Implemented a minimalistic design to highlight recent projects, showcasing a blend of technical proficiency and aesthetic sensibility.
